

## Actos and Botox Injections

Actos (Generic name: Pioglitazone Hydrochloride) being an oral anti-diabetic medicine helps in lowering the blood sugar level which occurs due to type 2 diabetes. Doctors usually recommend oral intake of Actos once daily alongside diet and exercise. For buying Actos (Pioglitazone HCl) from any official licensed Actos Canada Drug Store, a legal RX for Canada prescription drugs is mandatory. There are large number of Online Stores which supply Actos (Pioglitazone) and other diabetes medicines at much lower cost. Big Mountain Drugs offers Actos (Pioglitazone) dose in the following strength: Actos 15 mg, Actos 30 mg, and Actos 45 mg.

Botox injection (Generic name: Botulinum Toxin Type A) is a type of cosmetic treatment which is generally used to cure cervical dystonia (CD), treat normal to extreme frown lines. These days&rsquo; Botox injections are considered as one of the most in style cosmetic surgery practice. Botox injections relax the body muscles to reduce the facade of frown lines and wrinkles. Botox injections are a prescription medicine in Canadian pharmacy & for buying them from any licensed Canada Drug Store, authentic RX is mandatory. Botox injections are available at a discount price at Big Mountain Drugs stores and are available in 100 IU vial.
